Art Unit: 2821

DETAILED ACTION

1. The Preliminary Amendment filed on October 23, 2003 is acknowledged.

2. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1,6,7,11, and 12 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,6,7,11, and 12 of U.S. Patent No. 6,683,575. Although the conflicting claims are not identical, they are not patentably distinct from each other because the omission of an element and its function in a combination is an obvious expedient if the remaining elements perform the same function as before. In re Karlson 136 USPQ 184 (CCPA 1963). Claims 1,6,7,11 and 12 which eliminate elements (a series-resonance frequency of the first, second, and fourth linear antenna elements, a parallel-resonance frequency of the second, third, and

Application/Control Number: 10/690,587 Page 3

Art Unit: 2821

fourth linear antenna elements ...) and their function with the remaining elements functioning as before, are therefore merely an obvious variation of claims 1,6,7,11 and 12 of US Patent No. 6,683,575.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to HoangAnh T Le whose telephone number is (571) 272-1823. The examiner can normally be reached on 8:00am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on (571) 272-1834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

6. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
